

GeoCloud Protect

Advanced protection for
advanced solutions.

GeoCloud Protect is your Leica TS20's digital surveillance, delivering cutting-edge theft deterrence that's as advanced as your instruments. It combines remote locking and real-time tracking to make stolen equipment inoperable and remove its resale value after theft. By reducing theft and increasing recovery rates, GeoCloud Protect keeps your equipment safe, your business running, and your mind at ease. The GeoCloud Protect service is seamlessly integrated into the new GeoCloud Fleet portal, enabling users to access its location and theft deterrence features directly from their phone or office.

Reliable, real-time device tracking

GeoCloud Protect offers reliable positioning for your TS20 total stations through GNSS, Wi-Fi and Cellular (limited to LTE). Track all devices on a map, receive live updates by the minute, and export exact addresses and Google Maps locations for sharing.

Security and theft deterrence

With the GeoCloud Fleet web or mobile App, you can remotely lock and unlock your total stations, making them unusable even when powered off. In the unfortunate event of theft, you can report your total station as stolen, triggering more frequent location updates to aid in its recovery.

Robust movement alert system

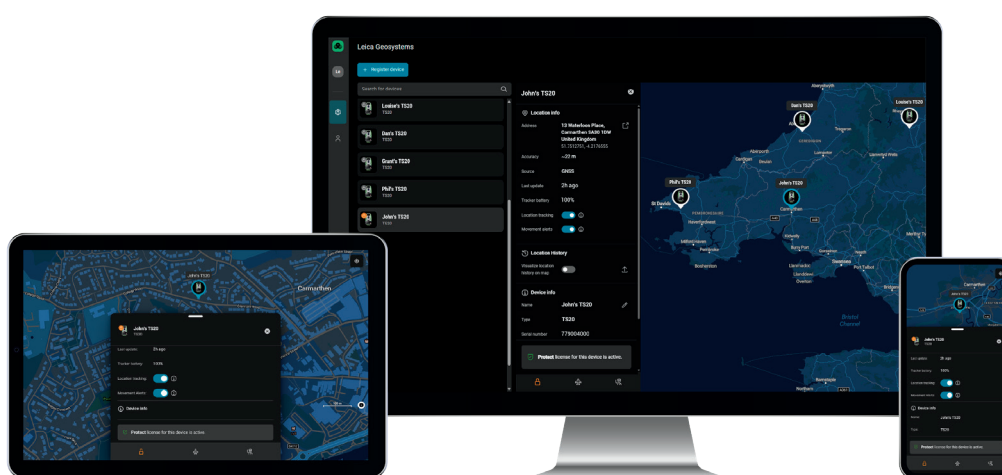

Receive immediate movement alerts via email or push notifications on your smartphone if your device is moved, enhancing recovery chances. Access and export complete location history for your total stations, helping authorities with map locations and cross-reference surveillance footage to identify thieves and recover equipment.

Web and mobile App functionalities
